

## Chris Shepherd Band

### BAND STORY

" Through Him, with Him and in Him... The band's main goal is still to draw all people into a closer relationship with God using their secular influences to create music to reach people that might not be interested in mainstream Christian music. The guys still love using the blues to spread the news but the truth is they really mix it up using many different styles and influences. Their goal is to use the music to cross generation, racial and religious boundaries. Performances range from Chris performing solo or an unplugged band arrangement to full blown rockin blues concert. The guys try to fit their style and music into almost any venue from small and intimate to outside amphitheatres. The band plays mostly around the St, Louis area but also travels somewhat throughout the Midwest sharing the Gospel though original music full of faith, hope and love."
